

HAZEM MOHAMED RAMADAN

Software Engineering & Information Technology Student

Heliopolis, Cairo, Egypt | +20 102 575 5662 | hazemmohamedd9923@gmail.com | linkedin.com/in/hazem-mohameeed

PROFESSIONAL SUMMARY

Software Engineering student specializing in data analytics and data science, with hands-on experience collecting, cleaning, and analyzing large datasets to extract actionable insights. Skilled in building data models, running A/B tests and statistical analyses, and developing KPI dashboards (Power BI) to track business metrics like revenue, conversion rate, churn, and campaign ROI. Experienced conducting exploratory data analysis and communicating findings clearly to stakeholders, with a track record of turning analysis into concrete recommendations (retention strategy, budget reallocation, product experiments). IBM Data Science Professional Certificate holder with cross-functional exposure across banking, digital transformation, and sustainability business units. Seeking a Data Analytics and Science internship to apply data-driven analysis and modeling skills to real-world product and user-behavior questions.

TECHNICAL SKILLS

Data Analytics & Statistics: Data Collection & Web Scraping, SQL Querying, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), A/B Testing, Hypothesis Testing (Z-test, Chi-square), Statistical Techniques, Feature Engineering, KPI Definition & Tracking, Trend & Anomaly Detection, Model Evaluation & Metrics (Accuracy, Precision, Recall, F1, ROC-AUC)

Data Modeling & Machine Learning: Supervised Learning, Regression, Classification, Clustering, Recommender Systems (Collaborative & Content-Based Filtering), Text Vectorization (TF-IDF), Cosine Similarity

Data Visualization & Reporting: Power BI, Tableau, Excel (Dashboards, Pivot Tables), Matplotlib, Seaborn, Plotly, Dash, Folium — building visual reports to communicate insights to stakeholders

Tools & Languages: Python, SQL, Pandas, NumPy, Scikit-learn, MySQL, Jupyter Notebook, Git/GitHub, JavaScript, C++, C#

DATA ANALYTICS & DATA SCIENCE PROJECTS

SpaceX Falcon 9 First-Stage Landing Prediction (IBM Data Science Capstone) | *Python, Pandas, SQL, Web Scraping, EDA, Machine Learning*

- Collected and cleaned launch data via the SpaceX REST API and web scraping (Wikipedia), consolidating multiple raw sources into a single structured dataset for analysis.
- Performed exploratory data analysis and SQL querying to uncover trends and relationships between launch site, payload mass, orbit type, and landing outcome.
- Built interactive visualizations (Folium maps, Plotly Dash dashboard) to communicate launch-site and outcome patterns to non-technical stakeholders.
- Trained and compared classification models (Logistic Regression, SVM, Decision Tree, KNN) to predict first-stage landing success, selecting the best model via cross-validation and accuracy comparison.

Telecom Customer Churn Analysis | *Python, Pandas, Scikit-learn, SQL, Power BI*

- Preprocessed and analyzed the IBM Telco Customer Churn dataset using Python and SQL, building a predictive model to identify customers likely to churn.
- Identified month-to-month contracts, high monthly charges, short tenure, and electronic check payments as the strongest churn drivers, and built a Power BI dashboard to present findings; recommended targeted retention strategies for high-risk segments.

Sales KPI Dashboard | *Power BI, SQL*

- Developed an interactive Power BI dashboard from CSV and SQL-sourced sales data, tracking Revenue, Profit, Gross Margin, Order Volume, AOV, Monthly Sales Growth, Customer Retention Rate, and Top-Selling Products.
- Enabled filtering by region, product category, and time period to support ongoing business performance monitoring and KPI tracking.

Marketing Campaign Performance Analysis | *Python, Pandas, Matplotlib, Power BI*

- Analyzed impressions, clicks, conversions, spend, CTR, CPC, CPA, and ROI across marketing campaigns to identify underperforming vs. high-ROI channels.
- Recommended reallocating budget toward high-performing channels and optimizing audience targeting to improve campaign efficiency — a direct data-driven optimization exercise.

A/B Testing & Statistical Analysis | *Python, SciPy, Statsmodels*

- Designed and evaluated an A/B test comparing two landing page variants, applying a two-proportion Z-test (and Chi-square as an alternative) to assess conversion rate differences.
- Found a statistically significant improvement in conversion rate for Variant B ($p < 0.05$), supporting its deployment as the better-performing version.

PROFESSIONAL EXPERIENCE

Software Engineering Intern | *CIB (Commercial International Bank), Cairo, Egypt* July 2025

- Completed a structured multi-department rotation across 3+ business units (banking operations, digital transformation, sustainability), collaborating cross-functionally to understand how data and metrics are used to define success criteria across teams.
- Gained hands-on exposure to enterprise-scale financial data systems and industry-standard data governance and compliance practices.

Freelance Software Developer | *Self-Employed, Remote* 2024 – Present

- Delivered 3 client-facing production applications on time and within scope, achieving 100% client satisfaction.
- Built an automated Excel invoice generator and a browser-based Purchase Order generator (JavaScript, SheetJS, jsPDF) that processed 100+ rows of vendor data, saving the client approximately 5 hours per week — demonstrating data processing and workflow optimization.

EDUCATION

B.Sc. Software Engineering and Information Technology | *Egyptian Chinese University — Faculty of Engineering and Technology, Cairo, Egypt* Expected 2027

GPA: 3.42/4.0 | Relevant Coursework: Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Testing, Operating Systems, Computer Architecture

CERTIFICATIONS

IBM Data Science Professional Certificate | **Coursera**

Coverage: Python for Data Science, Data Analysis, Data Visualization, Machine Learning Fundamentals, SQL for Data Science, Applied Data Science Capstone.

LANGUAGES

Arabic — Native | English — B2 (Upper-Intermediate), technical proficiency in written documentation
